Tree Plantation

Trees beautify our surroundings, produce oxygen, absorb pollutants, sequester greenhouse gases, regulate temperature and prevent soil erosion, besides acting as wind barriers. They are grown for their aesthetic value in landscapes and or economic importance. The Indian tree flora diversity ranks 10th in the world and comprises of nearly 2000 species belonging to about 800 genera and 150 families of flowering plants, which includes majority of the cultivated and exotic species. With the increase in population, rapid expansion of area under food and commercial crops, deforestation, extension of urban area, establishment of industries in rural areas and other factors, there is considerable depletion of genetic wealth, many of them being in the verge of extinction.

The National Service Scheme (NSS) Unit of Institute of Pharmaceutical Education and Wardha organized “Tree Plantation” programme on 29/07/24 inside as well as outside the college premises 43 students of B. Pharm and M. Pharm students were participated in Tree Plantation.

The purpose to organize a blood donation camp is to motivate people to donate blood and social works. The purpose of blood donation camp to select a suitable donor whose blood will be safe to the recipient and who himself shall not in any way be harmed by blood donation. Organization of blood donation camp should be best and safe to the patient/recipients and to the blood donor. Blood donation camp should motivate the public to donate blood by oral communication, which is the most effective method of recruiting donors. Talk about the need of blood, shortage of blood, ease of donation and myth about blood donation to the public.
